

FIRST AID PLAN FOR

Anaphylaxis

Anaphylaxis is the most severe type of allergic reaction and should always be treated as a medical emergency. Anaphylaxis requires immediate treatment with adrenaline (epinephrine). If treatment with adrenaline is delayed, this can result in fatal anaphylaxis.

MILD TO MODERATE ALLERGIC REACTIONS

SIGNS

Swelling of lips, face, eyes

Tingling mouth

Hives or welts

Abdominal pain, vomiting (these are signs of anaphylaxis for insect allergy)

ACTIONS

- Stay with person, call for help
- Locate adrenaline device
- Phone family/emergency contact
- Insect allergy flick out sting if visible
- Tick allergy seek medical help or freeze tick and let it drop off

Mild to moderate allergic reactions may not always occur before anaphylaxis

ANAPHYLAXIS (SEVERE ALLERGIC REACTIONS)

WATCH FOR ANY ONE OF THE FOLLOWING SIGNS

Difficult or noisy breathing

Swelling of tongue

Swelling or tightness in throat

Wheeze or persistent cough

Difficulty talking or hoarse voice

Persistent dizziness or collapse

Pale and floppy (young children)

Abdominal pain, vomiting (these are signs of anaphylaxis for insect allergy)

EpiPen® Jr (150 mcg) is for children 7.5-20kg EpiPen® (300 mcg) is for children over 20kg and adults

Anapen $^{\circledR}$ 500 mcg is for children and adults

ACTIONS

- 1 LAY PERSON FLAT do NOT allow them to stand or walk
- If unconscious or pregnant, place in recovery position on left side if pregnant
- · If breathing is difficult allow them to sit with legs outstretched
- Hold young children flat, not upright

2 GIVE ADRENALINE DEVICE as shown on the label

- 3 Phone ambulance 000 (AU) or 111 (NZ)
- 4 Phone family/emergency contact

6 Transfer person to hospital for at least 4 hours of observation

IF IN DOUBT GIVE ADRENALINE DEVICE

Commence CPR at any time if person is unresponsive and not breathing normally

ALWAYS give adrenaline device FIRST if someone has SEVERE AND SUDDEN BREATHING DIFFICULTY (including wheeze, persistent cough or hoarse voice), even if there are no skin symptoms. THEN SEEK MEDICAL HELP.

If adrenaline is accidentally injected, phone your local poisons information centre. Continue to follow this action plan for the person with the allergic reaction.
