

australasian society of clinical immunology and allergy inc.

annual report 2009

The mission of ASCIA is to advance the science and practice of clinical immunology and allergy, by promoting education and the highest standard of ethical medical practice.

ASCIA is the peak professional body of Clinical Immunologists and Allergists in Australia and New Zealand, and is a member organisation of the World Allergy Organisation (WAO).

ASCIA 2009

Jill Smith, ASCIA Executive Officer

Congratulations to Dr Patrick Quinn and the ASCIA 2009 committee members on the highly successful 20th ASCIA Annual Scientific Meeting. The stimulating scientific program included presentations by 4 international and 38 local speakers and was complimented by an excellent social program.

The Welcome function featured wine tasting from the McLaren Vale and a String Quartet, whilst the Gala Dinner was set in the magnificent Adelaide Town Hall and included an entertaining and insightful dinner speaker, Dr Peter Goldsworthy AM.

We have received extremely positive feedback from delegates regarding the meeting and look forward to welcoming you all to the Gold Coast in September 2010 (www.ascia2010.com).■

PRESIDENT'S REPORT

A/Prof Raymond Mullins

It is with pleasure that I briefly highlight some of our achievements over the last year. In particular, I would like to thank Dr Patrick Quinn and the ASCIA 2009 local organising committee, who made the 20th Annual Scientific Meeting of ASCIA an enriching one.

Thank you also to the speakers and chairs for giving up their time for this meeting and to sponsors and exhibitors for their continued support, particularly in these challenging economic times.

I am pleased to report that our Society continues to grow, with over 400 members currently, compared to 280 at the end of 2007.

The ASCIA website remains an important and credible source of information, attracting over 70,000 visitors per month. The major challenge is to ensure the ASCIA website articles remain up to date and represent best current practice.

New ASCIA working parties have recently been established to address specific issues, including the ASCIA HAE working party chaired by Prof Connie Katelaris (to develop guidelines for the management of

patients with hereditary angioedema), the ASCIA Pneumococcal working party chaired by A/Prof Dom Mallon (to study serological responses to pneumococcal vaccination) and there have been expressions of interest in an ASCIA autoimmunity working party.

ASCIA committees and working parties continue to work hard on developing educational resources, which enhance patient care and our credibility when liaising with government.

In this regard, I would like to highlight the work of A/Prof Richard Loh and the members of the ASCIA Anaphylaxis working party, who have developed online educational resources for anaphylaxis education in our schools and childcare services during 2009, for launch in early 2010.

ASCIA Advanced Training Meetings have continued their previous success with an Autoimmunity Training meeting held at Manly in May 2009.

I would also like to take the opportunity to congratulate A/Prof John Ziegler, who was awarded an Order of Australia in 2009.

While we are a small Society, our constituency comprises 1 in 5 Australians with immune and allergic disease, who do not have equitable access to proven therapies. There is an increasing divide between service demand and service availability, and the ability of some of our non-specialist colleagues to deal with more complex cases.

Our long term challenges essentially remain the same:

- Ensure the number and security of training places for Immunology/Allergy is maintained or increased.

- Training of specialists needs to be complemented by up-skilling of generalists who are the frontline clinicians involved in the care of patients with allergic and immunological disorders.
- Ensure that ASCIA is well represented in the public debate on allocation of healthcare resources.
- Establish a working relationship with federal government representatives in Canberra who are important in the administration of our profession (this is perhaps even more challenging when the political focus has centred on public finances and hospital reform).
- There is also the opportunity to enhance ties with our sister organisation, the Australasian Society for Immunology (these ties have been dormant for some time).

Finally, I would like to offer personal thanks to members of the ASCIA Executive and Council, who have worked so hard over the last year, and in particular to Dr Tiffany Hughes who is retiring from Executive at this meeting, but not from Council and her many other ASCIA related activities.

I am looking forward to seeing you all again in Queensland for the 21st Annual Scientific Meeting of ASCIA in September 2010.

Dr Davis Gillis and his local organising committee have developed a very interesting program which covers a wide range of topics, reflecting the diversity within our Society. ■

Prof Dominic Mallon

Advanced Trainee Representative
Dr Alisa Kane

TREASURER'S REPORT

Dr Melanie Wong

In 2008-2009 ASCIA had a 6% increase in revenue, a 24.5% increase in cash (largely due to annual fee increases and ASM surplus) and a 16% decrease in expenditure compared to the previous year.

Whilst this should have provided ASCIA with a profit, the ASCIA investment with Macquarie Private Portfolio Management (MPPM) in 2008-2009 was still significantly affected by the economic downturn that began in early 2008, which was the reason for a loss and reduction in equity.

The loss was much less than in the previous financial year and it appears that the value of the ASCIA MPPM investment has begun to increase in the last two quarters.

OPERATING STATEMENT SUMMARY

	08-09	07-08
Total Revenues	705,596	664,711
Total Expenses	758,460	902,019

Net profit (loss) (52,865) (237,308)

FINANCIAL POSITION SUMMARY

	08-09	07-08
Total Assets	1,157,983	1,214,928
Liabilities	238,442	229,232
Ret'd Profits	1,095,374	1,148,238

Equity 919,541 985,996

CASH FLOW STATEMENT SUMMARY

	08-09	07-08
Cash (start of yr)	480,892	582,980
Cash (end of yr) 598,552 480,892		

ASCIA INVESTMENTS AND GRANTS

From 2004 to 2007 the ASCIA MPPM investment provided a high return on investment, enabling ASCIA to spend \$497,000 on grants, awards and endowments from 2004 to 2008.

This was a large commitment for a relatively small organisation such as ASCIA. As the grants funded by ASCIA depended on the continuity of a strong investment market and profit from the ASCIA ASMs, a decision was made in May 2008 to temporarily cease future funding of ASCIA grants and awards, until the investment market recovers. ASCIA will then need to reconsider its investment strategy to maximise return and minimise risk.

Grants and awards provided by ASCIA in 2009 were supported by companies and this will continue to be the case until the ASCIA MPPM investment value increases significantly.

FUTURE SOURCES OF INCOME

ASCIA income is dependent on Annual Scientific Meetings and annual membership fees, which were increased in 2008, and effective as of 2009. No increase of annual fee is proposed for 2010. It is envisaged that a small increase every two years will be implemented, consistent with increases in costs of services and CPI. ■

EXECUTIVE OFFICER'S REPORT

Jill Smith

ASCIA 2009 ASM

It has been a pleasure to work with Dr Patrick Quinn and the ASCIA 2009 local organising committee, in conjunction with ICMS Australasia. Thank you in particular to all the speakers, chairs, sponsors and exhibitors for their support.

ASCIA 2009 Autoimmunity advanced training meeting

This meeting was held at the Novotel Manly Pacific Hotel in May, after the Westmead ICPMR Immunopathology Update. Feedback from participants was very positive. A three year rotation of advanced training meetings is planned:

- APPID Summer School in 2010
- Allergy Advanced Training meeting in 2011
- ASCIA Autoimmunity Training meeting in 2012.

Educational resources

Development of an Anaphylaxis training program has been a major focus for 2009 as well as the development and review of several documents, assisted by ASCIA committees and working parties.

Development of educational materials not only provides useful information for patients and health professionals. It also increases the opportunities for ASCIA to

liaise with government and other organizations. Examples of resources developed in 2009 include:

ASCIA Anaphylaxis WP

Revised Action Plans for Anaphylaxis, Action Plan for Allergic Reactions, First Aid for Anaphylaxis (to be translated), and ASCIA anaphylaxis e-training.

ASCIA Education Committee

Contribution to "Inhealth" Allergy & Hay Fever booklet, Allergic Rhinitis Checklist and review of all patient information on ASCIA website.

ASCIA Paediatrics Committee

Finalisation of ASCIA Food Challenge protocols

ASCIA Immunodeficiency Committee

Review of patient information on ASCIA website and development of new article

Coordination of ASCIA committee and working party meetings

In 2009 ASCIA committees and Working parties have been extremely active, resulting in an increased number of teleconferences, email reviews, correspondence with government and other organisations. A special face to face meeting for anaphylaxis training was held in June 2009.

Access to skin prick test (SPT) allergens

ASCIA has provided templates for Full ASCIA members (FRACP or FRCPA) to gain TGA Authorised Prescriber access to SPT allergens from two sources in Australia, Stallergenes and ALK-Abello, as well as Diater Penicillin SPT reagents. ASCIA has also provided information to doctors who are not authorized prescribers on how to access skin prick testing reagents.

Implementation of new procedures

Membership and chairmanship of ASCIA committees and working parties were confirmed after receiving nomination forms from ASCIA members. Terms of reference are now on the ASCIA website.

Continual increase in visitors to the new ASCIA website

Since its launch in November 2007, the new ASCIA website has attracted an average of around 70,000 visitors per month and with the launch of ASCIA anaphylaxis e-training this is expected to increase significantly.

Implementation of ASCIA ASM changes

The timing of the ASCIA ASM has reverted to early or mid September, convention centres are now the venues (rather than hotels) and Welcome and Closing functions are held at the same venue as the meeting.

In 2009 ASCIA hosted two 'satellite meetings', the ASCIA Allergy Update for Nurses, Dietitians and other health professionals on the Tuesday and the ASCIA Immunopathology Update on the Saturday immediately after the ASM. This will be continued for ASCIA 2010.

ASCIA sponsors & exhibitors

ASCIA is extremely grateful to our 2009 sponsors, who are listed in the ASCIA 2009 Program and Abstract Book and on the ASCIA website:
www.allergy.org.au/content/view/116/113/.

ASCIA is reliant on this sponsorship to run high quality ASCIA Annual Scientific Meetings at a reasonable cost to delegates.

We look forward to continued support in 2010 and beyond. ■

ASCIA Strategic Plan 2010-2014

INTRODUCTION

The Australasian Society of Clinical Immunology and Allergy (ASCIA) is a professional medical organisation, comprised predominantly of specialist medical practitioners in clinical immunology and allergy, immunology scientists and healthcare professionals (including medical practitioners, nurses and dietitians) working in the fields of allergy and clinical immunology.

ASCIA was established in 1991 following the amalgamation of the Australian College of Allergy (ACA) with the Clinical Immunology Group (CIG) of the Australasian Society of Immunology (ASI).

In 1999, when ASCIA had approximately 200 members, an ASCIA Strategic Plan for 1999 to 2003 was developed, with the main aim of increasing the profile of the disciplines of clinical immunology and allergy in Australia and New Zealand. Following this, the ASCIA Strategic Plan for 2004 to 2009 was developed.

At the beginning of 2010 ASCIA has 415 members. Around 10% of these members are currently training to become specialist medical practitioners in clinical Immunology and allergy.

The ASCIA Strategic Plan for 2010 to 2014 is based on an amended mission and objectives which reflect the considerable development of ASCIA and the advances in research and management of allergic, autoimmune and immune deficiency diseases over the last 10 to 20 years.

MISSION

- Advance the science and practice of clinical immunology and allergy, by promoting education and the highest standard of ethical medical practice and research; and
- Ensure best practice medical care, including access to diagnostic and therapeutic agents for conditions involving clinical immunology and allergy.

OBJECTIVES

1. Development of the profile of the discipline of clinical immunology and allergy and securing of the position of ASCIA as the leading professional organisation and authority for allergic and immune diseases in Australia and New Zealand, amongst medical practitioners, other health professionals, governments, regulatory authorities, other organisations, medical students, physician trainees, media and the public.
2. Utilisation of the expertise within the ASCIA membership to address current issues relevant to the disciplines of clinical immunology and allergy.
3. Ensure the financial sustainability of ASCIA activities.
4. Advocate for patients with conditions involving clinical immunology and allergy, to ensure best practice medical care, including access to diagnostic and therapeutic agents.
5. Promotion of research into clinical immunology and allergy, with particular emphasis on issues relevant to Australia and New Zealand.

Actions relating to these objectives are listed on the following pages.

OBJECTIVE 1

Development of the profile of the discipline of clinical immunology and allergy and securing of the position of ASCIA as the leading professional organisation and authority for allergic and immune diseases in Australia and New Zealand, amongst medical practitioners, other health professionals, governments, regulatory authorities, other organisations, medical students, physician trainees, media and public.

ACTIONS

- Continue promotion of clinical immunology and allergy training to medical students and physician trainees, using the ASCIA website and links to the Royal Australasian College of Physicians (RACP) and the Royal College of Pathologists of Australasia (RCPA).
- Continue annual ASCIA advanced training meetings (which recommenced in 2007) with a 3 year rotation of themes between allergic, autoimmune and immune deficiency disease.
- Identify opportunities to maximise and enhance participation of advanced trainees in ASCIA Annual Scientific Meetings (e.g. providing travel scholarships and awards where funds permit).
- Identify opportunities to enhance participation of ASCIA members and other health professionals in ASCIA Annual Scientific Meetings (e.g. publishing abstracts in the IMJ, which has been supported by ASCIA since 2006).

- Continue to support allergy and immunology education initiatives for nurses, dietitians and other health professionals (e.g. Allergy & Immunology Updates held the day before ASCIA Annual Scientific Meetings).
- Continue to support education initiatives for scientists (e.g. Immunopathology Updates held the day after ASCIA Annual Scientific Meetings).
- Liaise with governments regarding provision of clinical immunology and allergy services, at the direction of ASCIA Council.
- Increase contact and dialogue with relevant organisations (e.g. RACP, RCPA, TGA, PBAC, NBA, ACCC, PHARMAC and NZBS).
- Continue the development of the ASCIA website to be an authoritative and educational resource for medical specialists, general practitioners, other health professionals, media and the public.

OBJECTIVE 2

Utilisation of the expertise within the ASCIA membership to address current issues relevant to the disciplines of clinical immunology and allergy.

ACTIONS

- Maintain currency and develop ASCIA educational resources, position papers, guidelines, advice, action and care plans and other documents by ASCIA committees, working parties and subcommittees.
- Continue development of the ASCIA website for health professional and community education.

- Support the development of online e-training programs as designated by ASCIA Council.
- Review issues that were identified in the ASCIA / Access Economics Economic Report (November 2007) and identify opportunities to address these.
- Rotate Chairs and membership of ASCIA committees and working parties, as implemented in the ASCIA terms of reference document developed in 2008.
- Engage with the media to promote evidence based medical care, and respond to current events, which are relevant to Clinical Immunology and Allergy.

OBJECTIVE 3

Ensure the financial sustainability of ASCIA activities

ACTIONS

- Regularly review ASCIA financial position.
- Maximise return from ASCIA Annual Scientific Meetings to benefit the disciplines of clinical immunology and allergy.
- Reinvest or distribute surplus from ASCIA investments and Annual Scientific Meetings in the most beneficial way for ASCIA members and the disciplines of clinical immunology / allergy as determined by Council.
- Allocate grants, awards and scholarships for ASCIA.

OBJECTIVE 4

Advocate for patients with conditions involving clinical immunology and allergy, to ensure best practice medical care, including access to diagnostic and therapeutic agents.

ACTION

Engage with government agencies and regulatory authorities to ensure access to best practice medical care, by addressing:

- workforce issues and training places
- access to necessary diagnostic and therapeutic reagents.

OBJECTIVE 5

Promote research into clinical Immunology and allergy, with particular emphasis on issues relevant to Australia and New Zealand.

ACTIONS

- Use ASCIA grants and research support to provide seed funding for research initiatives unlikely to attract funding from other sources.
- Engage with government and private agencies to promote funding for research into clinical immunology and allergy. ■

ASCIA MEMBER LIST

As at 31 December 2009 ASCIA had 415 members, including the 69 new ASCIA members approved in 2009. The following list of 427 ASCIA members also includes 12 new ASCIA members approved in February 2010.
